

## MAINTENANCE FLOOR CARE FOR - VINYL BACKED AND UNBACKED

The Vinyl Rx products incorporate a polyurethane reinforcement, which protects the floor covering by resisting soiling and scuffing. Rubber feet or rubber mats may cause permanent staining to vinyl surfaces. Ecore does not recommend the use of equipment containing rubber feet or rubber backed mats. Combined with the superior closed surface finish, this enhanced protection allows the use of a polish-free maintenance regime. This protection ensures that the intensity of the maintenance and overall cleaning costs are significantly reduced. The following maintenance instructions are designed to maximize the benefits of the PUR, resulting in lower maintenance costs, without compromising the long-term appearance of your floor covering.

### INITIAL CONSTRUCTION CLEAN

1. Remove all loose debris.
2. Ensure that all traces of adhesive are removed from the surface of the floor covering.
3. Mop sweep or vacuum to remove dust and grit.
4. Damp mop with a suitable neutral detergent such as E-Cleaner.
5. If required, dry buff with a 1000 rpm plus rotary machine fitted with a suitable clean pad

ROUTINE MAINTENANCE - The following recommendations are provided as a guideline, and the frequency can be changed to optimize the appearance.

### DAILY

1. Mop sweep or vacuum to remove dust and loose dirt.
2. If required, spot mop to remove stubborn marks, with a neutral cleanser.

### WEEKLY

1. Assess the appearance of the floor. Undertake the following as required:
2. Light scuffing – dry buff with a 1000 rpm plus rotary machine fitted with a suitable clean pad.  
or
3. Heavier scuffing – spray clean using a floor maintainer and 1000 rpm plus rotary machine fitted with a suitable clean pad.

### PERIODICALLY

1. Assess the appearance of the floor. If the floor has dirt build-up, machine scrub with a scrubber dryer (approx. 165 rpm) fitted with a suitable clean pad, using a neutral or alkaline detergent, as appropriate.
2. Rinse thoroughly and allow to dry.
3. Dry buff to restore finish.
4. The maintenance regime requires the installation of an effective barrier matting system.
5. Cleaners and detergents should be diluted as per the manufacturers' instructions. For recommended products, see the Approved Maintenance Products sheet.
6. Always follow the Health and Safety guidance provided, and dilute cleaners and detergents in accordance with the manufacturers' instructions.
7. Fit protective feet to table and chair legs, to prevent scratching.
8. These maintenance instructions are intended for the PUR Vinyl Rx floor covering products, which have a polyurethane reinforcement.

**NOTE:** In most instances, the above maintenance regime will be sufficient to ensure your floor covering retains the optimum appearance. However where there is no mechanical means of maintaining the floor or should you wish to provide extra protection in heavily trafficked areas, a metalized floor polish should be applied. For further information, contact KRS Inc. (262.798.8900 | [info@krsinc.com](mailto:info@krsinc.com)). At the date of issue the data presented is correct. However, Ecore reserves the right to make changes which do not adversely affect performance or quality.

**REGULAR CLEANING IS MORE BENEFICIAL TO THE FLOORCOVERING AND MORE COST-EFFECTIVE THAN OCCASIONAL HEAVY CLEANING.**
